DETAILED ACTION

1. It appears that the prosecution of this reissue application was undertaken prematurely, as PTO's PALM system did not have a record of this application being published in the Official Gazette.

The office cannot act until 2 months after the application has been published in the Official Gazette.

The application has been now been published (2-14-06), 2 months have passed and the office may now reopen prosecution.

Response to Amendments / Arguments

2. The new declaration is not acceptable.

The statement of error is insufficient. It is stated that it would be desirable to include independent claims which do not recite "error processing means." However, original claims 4 and 6 already do not recite "error processing means."

3. Applicant's amendments to the claims overcome the recapture rejection.

4. The original patent has been surrendered and is artifact file 09654929za.

5. New corrected drawings in compliance with MPEP 1413 are required in this application because changes were made to figures 2 and 7 in response to examiner's objection. The new drawings shall include the label "Amended". The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

6. A discussion of the support in the specification for all functions of all the new claims has not been provided as required by 37CFR 1.173(c)
